

K-Love radio is on two different stations in my area but I drive such a far distance each day that each station is needed because I drive out of range from one and then change the station to the other. This is a great station and it would leave a real void not only for my family, but for the community as well. It's not like hard rock or rap stations whose music is not always a positive message. Even if you don't listen to this style of music, you have to like the outcome; a community who performs acts of kindness for one another, has respect for others and their property, keeps a positive outlook. Changing to a low power FM station would greatly reduce the range and thus the number of listeners reached. As it is, the small local channels sometimes fade in to the K-Love station and I'm not able to hear my station. K-Love is the only station I listen to because it's the only one I don't have to worry about what my children hear. No shock jocks, no sexual innuendos, it's truly family friendly. This would be a great disservice to K-Love listeners and the community at large. Please DO NOT change the current service.
